## Weekly COVID-19 report

### COVID-19 Snapshot

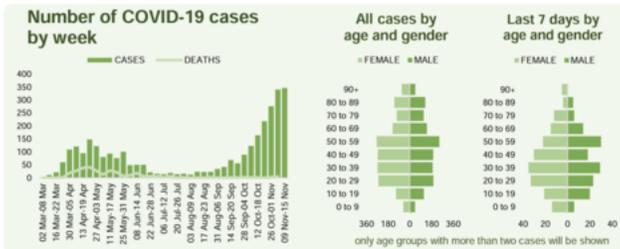

As of 18<sup>th</sup> November 2020 (data reported up to 15<sup>th</sup> November 2020)

Population 288,648

Direction of travel compares current snapshot against previous snapshot key ↑ Increasing ● no change ↓ decreasing

Full infographic and breakdown of the weekly figures are available on our website

### Weekly figures

This week we've seen an increase in 12 cases, whilst this might seem a small increase from last week we must not be complacent as there were still 346 new COVID-19 cases in the last week and more importantly four deaths.

Everyone must play their part in controlling the spread of the virus. Remember to:

- wash your hands regularly
- wear a face covering
- socially distance from anyone you don't live with

Also, if you have [symptoms, test positive or are asked to isolate by Test and Trace](#) you MUST do so and can be fined if you don't.

There is [support and advice available to you if you need help to isolate on our website](#).

The headline statistics from our weekly COVID report and our Public Health partner councils are provided below:

- Luton: 600 cases (up 63 from the previous week)
- Milton Keynes: 512 cases (up 164)
- Bedford: 291 (up 80)
