

Homework

Reading: Please continue to support your child with their reading at home, both their reading books and other appropriate books.

Spellings: The children will bring home a set of spellings each week that we ask you to support your child to learn for a spelling test every Friday.

Maths: They will also receive a piece of maths homework to complete that is linked to their learning in school. Please also help your child learn their times tables.

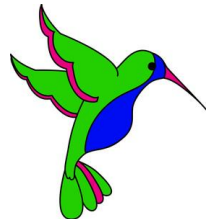

Useful Information

Children will come to school PE ready:

Hummingbirds – Tuesday and Friday

Toucans- Tuesday and Friday

Please ensure all clothing is named. Remember, any long hair needs to be tied back and ear rings removed.

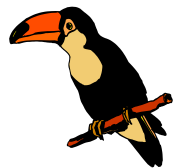

Year Two

Summer 2 Term

Planning

wriggle

and crawl

LITERACY

We will be writing lists and leaflet based on our reading of information texts. We will then move onto writing and reading instructions. Next, we will be reading several fiction books with minibeasts as the stars, and then write a book review. Finally, we will read poetry and try writing some of our own.

Mathematics

We will be focussing on measure this half term. We will be learning to tell the time. Then we will be measuring length, weight and capacity. Finally we will be moving onto tables, data and coordinates.

Jigsaw

This term we will be thinking changing me. I can tell you how I am different now to when I was a baby and say some of the changes that will happen to me as I get older.

Physical Education

We will be preparing for sports day with athletics practice and then moving onto team games learning to play kick rounders.

Music

We will be learning a unit call 'I wanna play in a band'. We will be learning to Listen & Appraise, new progressive Warm-up Games, Flexible Games, new progressive improvisation resources, and a new.

Religious Education

This term we will be considering the question 'How should we care for the earth and why does it matter?' We will be looking at how the earth was created, why we should take care of it and what we can do. We will be looking at how different religions care for the Earth too.

Project

Grab your coat and pooter – we're going out and about on a minibeast hunt. Sweep your nets in ponds and lift up logs to see who's home. Then set up a minibeast laboratory and observe their every move. Add notes and labels and ask research questions, just like a real entomologist. Learn about bees and worms and butterflies too. Can you make a food chain to show who eats who? Carry out investigations to find out more, like how far a snail travels in a day and how a spider catches its prey. Then animate to show how your favourite bug transforms from one form to another, perhaps a caterpillar to a butterfly or a maggot to a fly. On your belly, legs at the ready, it's time to wriggle and crawl.
